SUMMARY

Computer Engineering student with hands-on experience in full-stack web development using Python and JavaScript, and desktop GUI applications with Java. Built projects like a secure university exam platform (EduNexus) and a banking system in Swing. Strong grasp of data structures and a focus on building efficient, user-centered software.

EDUCATION

LJ INSTITUTE OF TECHNOLOGY

Sept 2023 – Mar 2027

Bachelor of Engineering in Computer Engineering and its Applications

- CGPA: 8.52/10.0
- **Coursework:** Data Structures, Database Management System, Advanced Calculus

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, Django, REST APIs

Libraries & Frameworks: Tailwind CSS, NumPy, Pandas, Scikit-learn, ShadCN/UI, Matplotlib, Seaborn, Swing

Databases: SQLite, MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, WAMP, XAMPP

PROJECTS

AlphaBank - Core Banking System

A desktop banking application with a complete GUI built using Java.

Key Features:

- GUI built with the **Java Swing** toolkit
- Secure Login & Role-Based Dashboards
- PIN-Authenticated Fund Transfers
- Account Management & Transaction History

EduNexus - Connected Digital Campus Platform

Built a comprehensive e-learning and university management portal using **React** and **Django**.

Key Features:

- Secure **JWT Auth** & Role-Based Dashboards
- AI-Proctored Exams (**OpenCV**)
- Attendance Management and Results

AutoServe360 - Digital Garage Management System

Developed a **full-stack** digital job card management system to modernize garage operations.

Key Features:

- Secure **JWT Auth** & Role-Based Dashboards
- Live Job Tracking & Inventory Management
- Automated PDF Invoicing via **REST API**

ACHIEVEMENTS & CERTIFICATIONS

- HackerRank: 5-star rating in Problem Solving
- Introduction to HTML, CSS and Javascript - Dec 2024
- Inheritance and Data Structures in Java - May 2024
- Exploratory Data Analysis for Machine Learning - June 2025
